Testifier Detector Test Equipment

Testifier Detector Test Equipment

Testifire is the world's first 3 in 1 detector tester. Suitable for single and multi-sensor detectors, it enables functional testing of Smoke, Heat and CO and offers a wide range of benefits over existing test tools.

Features

- Smoke, Heat & CO in one unit*
- Independent, simultaneous or sequential testing
- Clearing mode
- Capsule generated stimuli
- 'Hi Heat' setting for sensors up to 100°C

Benefits

- Increases productivity on site
- Compatible with widest range of detectors
- Controlled stimuli release prevents damage to the detector
- Non-pressurised capsules eliminate environmental concerns
- Designed for use with Solo Access poles

* CO available on Testifire 2001

Scorpion Detector Test Equipment

Scorpion is an innovative solution for functionally testing any hard-to access smoke detector.

A Scorpion head unit is a smoke generator which is installed next to the point detector or at the furthest sampling hole of an ASD pipe and when required, generates smoke for a functional test of the device.

A test that would have taken hours in planning, risk assessments and execution, is now completed in a matter of minutes and is as easy as testing a detector within reach.

Ideally suited for:

- Lift Shafts
- Ceiling and Floor Voids
- Secure Areas (e.g. Plant / Storage / Server room)
- Hazardous Areas

T210+ Test Source Flame Detector Tester

Features

- Approved for use in zone 1 & 2 areas (GPIIC gases)
- Adaptor plate to ensure perfect alignment
- IECEX Approved

Technical Information

Material	Glass filled polyester
Weight	0.8 kg
Supply Voltage	9 Vdc
Operating Temp	-10°C to + 50°C
Humidity	95% (Non Condensing)
Enclosure	IP54
Classification	Atex EExe ib IICT4. Suitable for use in zones 1 & 2 where group IIC gases or lesser hazards are sometimes present in explosive concentrations.
